

HIMANSHU KUMAR

Yamuna Nagar, Haryana | +91 87085 67019 | himanshukumar62028@gmail.com | LinkedIn

CAREER OBJECTIVE

Frontend & MERN Stack Developer who builds full-stack products end to end and validates them with real performance data — API response times, Lighthouse audits, and bundle analysis — rather than assumptions.

EDUCATION

Master of Computer Applications (MCA) Sep 2024 – Present
Kurukshetra University, Kurukshetra, Haryana

Bachelor of Computer Applications (BCA) Sep 2021 – Jul 2024
Seth Jai Parkash Mukand Lal Institute of Engineering and Technology, Radaur, Haryana

Senior Secondary Education (Class XII) Apr 2019 – Jul 2020
National Public School, Yamunanagar, Haryana

Matriculation (Class X) Apr 2017 – Jul 2018
National Public School, Yamunanagar, Haryana

SKILLS

Languages & Web: HTML5, CSS3, JavaScript (ES6+), C++

Frontend: React.js, Next.js, Hooks, Context API, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, RESTful API design

Performance & Tooling: Git, GitHub, Postman, Chrome Dev Tools, Bundle analysis, MS Office

EXPERIENCE

Freelance Full-Stack Developer — Self-employed July 2026 – Present
MERN stack development for a coaching center, delivering an end-to-end question-paper generation platform.

- Developing a question-paper generation platform that enables teachers to create customized assessments without manually compiling questions.
- Designed a centralized question bank with role-based access control, enabling administrators to manage curriculum-aligned questions and teachers to select questions for ready-to-use test papers.
- Architected the MongoDB database schema to support question categorization, administrative and teacher permissions, and test-paper generation workflows.
- Developed Express.js REST APIs for question bank management, role-based access control, and paper-generation functionality.
- Conducting software testing and refinement of implemented features, including the question bank, role-based access, and test-paper generation.

PROJECTS

InterviewIQ.ai | Live Demo | Github

Full-Stack Project | MERN (MongoDB, Express.js, React.js, Node.js), Tailwind CSS

- Built and shipped a 5-endpoint REST API (Node/Express) for InterviewIQ.ai, adding Google OAuth and an AI resume-parsing route; core endpoints hold 54–224ms response times under Postman testing.
- Three MongoDB schemas — interview, payment, user — handle session history, credit-based transactions, and profile data.
- The UI runs on 20 reusable React components, including an AI resume-analysis feature that pulls role, skills, and experience from uploaded PDFs in ~3.3 seconds.
- A Lighthouse audit turned up a 1.58MB unoptimized JS bundle and un-lazy-loaded video assets dragging Performance down to 41 (SEO 91, Accessibility 87); scoped a code-splitting and lazy-loading fix to address it.
- Deployed on Render with a continuous deployment pipeline.

Car Rental | Live Demo | Github

Full-Stack Project | MERN (MongoDB, Express.js, React.js, Node.js), Tailwind CSS

- Designed an 11-endpoint REST API across booking, owner, and user modules (Node/Express), with role-based access control and JWT-protected routes for renters and owners.
- Booking workflows — availability checks, booking creation, status updates — run on structured MongoDB schemas for cars, bookings, and users.
- 41 reusable React components make up the UI, covering owner-dashboard, listing-management, and booking flows, styled with Tailwind CSS.
- Image uploads for car listings and profile photos go through Multer middleware wired into protected owner routes.
- Lighthouse scores: 91 Performance (1.0s LCP), 92 SEO, 88 Accessibility.

Welth | Live Demo | Github

Full-Stack Project | PostgreSQL (Supabase), React.js, Node.js, Tailwind CSS, Next.js

- A wealth and expense-tracking app built on Next.js App Router, PostgreSQL (Supabase), and Tailwind CSS.
- Receipt scanning auto-parses uploaded receipts and categorizes expenses.
- A budget-planning engine tracks spending thresholds and fires alerts as users near their limits.
- Interactive Next.js dashboards visualize cash flow, savings, and multi-currency accounts.
- Lighthouse: 82 Performance (0.3s FCP), 98 Accessibility, 100 SEO.

CERTIFICATIONS

Build Responsive Real—World Websites with HTML and CSS

June 2023 – August 2023

Completed a comprehensive course covering modern HTML5, CSS3, Flexbox, Grid, and responsive design.

The Complete Full-stack Web Development Bootcamp

December 2024 – July 2025

Completed an in-depth bootcamp covering frontend and backend development using the MERN stack, REST APIs, authentication, and deployment.
